MARTIN CHETTY

Software Engineer | Python & Java Developer | Automation & QA Testing
Network Automation | Generative AI | CCNA Certified

martinchetty2002@gmail.com +91 9347967058 Bengaluru, India

LinkedIn GitHub Portfolio

Professional Summary

Computer Science graduate and former Software Automation Engineer on a fixed-term apprenticeship at Cisco, with experience in Python, enterprise networking, IP address management (IPAM), and infrastructure automation. Developed AI-powered applications using Agentic AI, LangChain, LangGraph, and Retrieval-Augmented Generation (RAG). CCNA-certified, with credentials in network automation and AI, and project experience in software development, AI applications, and automation workflows.

Technical Skills

Programming:	Python, Java, SQL
AI & Generative AI:	LLMs, Agentic AI, RAG, LangChain, LangGraph, Embeddings, Semantic Search, ChromaDB, FAISS
AI Development Tools:	OpenAI Codex, GitHub Copilot
Automation & Testing:	Python Automation, Network Automation, IPAM, Debugging, Software Testing Fundamentals
Networking & Linux:	CCNA, TCP/IP, Routing & Switching, Linux Administration, Shell Commands, File Permissions, Process Management
Version Control:	Git, GitHub
Frameworks & Libraries:	FastAPI, Streamlit, Pandas, NumPy, Scikit-learn
Development Tools:	VS Code, Jupyter Notebook, Jira
Web & Databases:	HTML, CSS, MySQL

Professional Experience

Cisco Systems **Oct 2025 – Oct 2026**
Software Automation Engineer | Firepower Developer (SBGE InfraOps) *Bengaluru, India*

- Contributed to enterprise data center infrastructure operations and automation initiatives.
- Worked on IP address management (IPAM) workflows and operational processes aimed at reducing manual effort.
- Gained hands-on exposure to data center infrastructure, networking components, and enterprise operational practices.
- Applied Python and software engineering principles to automation initiatives and proof-of-concept applications.
- Contributed to a team-built Agentic AI assistant using LangChain, LangGraph, and RAG; worked on debugging and infrastructure-related challenges.
- Completed Cisco-sponsored training in software automation, testing, networking fundamentals, cloud technologies, and enterprise software development.

CodeAlpha **Jun 2025 – Sep 2025**
Java Programming Intern

- Developed a Java Student Grade Tracker GUI to manage and monitor academic performance.
- Applied OOP and exception handling to build a structured, user-friendly application.
- Practiced debugging, problem-solving, and application testing during development.

SlashMark **Feb 2024 – May 2024**
Machine Learning Intern

- Developed machine learning models using Python and applied data preprocessing techniques.
- Performed data analysis, feature engineering, and model evaluation using Pandas and NumPy.
- Created data visualizations and dashboards to communicate analytical insights and support data-driven decisions.

Projects

Cisco Knowledge-Based Agentic AI Assistant (Cisco)

Technologies: Python, Streamlit, LangChain, LangGraph, ChromaDB, RAG, Embeddings, Vector Search, LLM Integration

- Contributed to a team-built AI knowledge assistant for Cisco product discovery, technical features, comparisons, and recommendations through natural-language queries.
- Contributed to a RAG workflow using document retrieval, embeddings, and semantic search for context-aware responses grounded in product knowledge.
- Worked on query intent classification and product detection workflows to identify user requirements and improve retrieval relevance.
- Contributed to LangChain and LangGraph agentic workflows for multi-step query processing and product information retrieval.
- Debugged dependencies, retrieval workflows, and response generation; performed functional checks of retrieved context and answer relevance.

AI Document Q&A System

Technologies: Python, LangChain, FAISS, Groq LLMs, Streamlit

- Built a document question-answering application with multi-format ingestion, text chunking, vector retrieval, and semantic search.
- Developed a Streamlit interface for document-grounded responses, source attribution, and confidence scoring.

Agentic Chatbot

Technologies: Python, LangGraph, LangChain, Streamlit, Tavily, Groq LLMs

- Developed an agentic chatbot with web search and AI-generated news summaries.
- Implemented graph-based workflows for multi-step task execution and dynamic information retrieval.

AI India Travel Planner

Technologies: Python, LangChain, LangGraph, Groq LLMs, Streamlit, RapidAPI

- Built an AI travel planner generating personalized itineraries and hotel recommendations using travel APIs.
- Developed a conversational interface for interactive trip planning and itinerary generation.

Certifications

- **Cisco Certified Network Associate (CCNA)**
- **Cisco Certified Network Associate Automation**
- **Cisco Certified AI Technical Practitioner**
- **Generative AI with Large Language Models – Coursera (AWS & DeepLearning.AI)**
- **Complete Agentic AI Bootcamp with LangGraph and LangChain – Udemy**
- **Automation Testing – Simplilearn**
- **Full Stack Web Development – Tap Academy**
- **Oracle Cloud Infrastructure (OCI) AI Foundations Associate**

Education

Sri Venkateswara University College of Engineering (SVUCE) Tirupati, India

Bachelor of Technology (B.Tech) in Computer Science and Engineering

May 2025 CGPA: 8.33/10
